Education

- | | |
|-------------|--|
| 2018 – 2020 | University of California, Los Angeles
<i>B.A. Psychology (Departmental Highest Honors)</i>
<i>Specialization in Computing</i>
<i>GPA: 3.70</i>
<i>Honors Thesis: Enacting Institutional Connection to Reduce Stereotypes in STEM</i>
<i>Honors Advisor: Tiffany Brannon, PhD</i> |
| 2016 – 2018 | Cerritos Community College
<i>A.A. in Psychology</i>
<i>GPA: 3.97</i> |

Research Interests

- Theory
 - Group-based Hierarchies
 - Social Inequalities
 - Prejudice Reduction
- Methods
 - Quantitative and Big Data
 - Field Experiments

Research Experience

- | | |
|-----------------------|---|
| Jun 2020 –
Current | Pre-Doctoral Research Fellow
<i>UCLA Anderson School of Management</i> <ul style="list-style-type: none">• Assisted Professors Hengchen Dai, Jana Gallus, and Sherry Wu in their ongoing research projects.<ul style="list-style-type: none">– Literature reviews, IRB proposals, field partner outreach– Advanced survey design via Qualtrics– Project management and financial bookkeeping on Prolific and MTurk– Data cleaning, data management, data visualization, data analysis, and exploratory analysis– Manuscript editing and revisions• Professional and career development<ul style="list-style-type: none">– Faculty/Grad student research presentations from Behavioral Decision Making and Management departments– Data visualization and data analysis workshops via Institute for Digital Research and Education (Statistics Department) |
| Mar 2021 –
Current | Research Data Analyst
<i>Carnegie Mellon University</i> <ul style="list-style-type: none">• Data analyst for the Behavioral Change for Good flu shot mega study• Supervisors: Professors Hengchen Dai (UCLA) and Silvia Saccardo (CMU)<ul style="list-style-type: none">– Summary statistics (e.g., demographics, dependant variable verification, transformations)– Data wrangling– Ordinary Least Squares regression analysis– Robustness checks using Logit regression– Heterogeneous Treatment Effects of preregistered variables of interests– Data visualization via ggplot (graphs) and overleaf (tables) |

Jun 2019 – Jun 2020	<p>Student Affairs Research Analyst <i>UCLA Student Affairs Research and Information Office (SAIRO)</i></p> <ul style="list-style-type: none"> • Project: MyUCLA mobile application development <ul style="list-style-type: none"> – MyUCLA is the central hub for all communication and records for students and staff • Supervisor: Kristen McKinney PhD, (SAIRO Director) <ul style="list-style-type: none"> – Data mining of existing UCLA staff/student records for the development of a survey – Survey development (target N = 10,000) – Focus group questionnaire development (target N = 50) – Data analysis and visualization – Project brief and policy recommendation write up
Jun 2018 – Jun 2020	<p>Research Assistant/Departmental Honors Student <i>Culture and Contact Lab, UCLA</i></p> <ul style="list-style-type: none"> • Honors Thesis: Enacting Institutional Connection to Reduce Stereotypes in STEM • Principal Investigator: Tiffany Brannon, PhD (Psychology) • Abstract excerpt: <p>The present research investigated whether priming an institutional social connection may spill-over to change existing beliefs of STEM. Approximately 185 UCLA undergraduates were recruited to measure (if any) social identity benefits for participants in STEM. Results showed that students under the experimental condition displayed higher situational interest in their STEM courses, and a decrease in their extrinsic motivation for careers in STEM. Lastly, the experimental condition display an increase in their beliefs of inclusivity for underrepresented groups in STEM.</p>
Jan 2019 – Jun 2020	<p>Ronald E. McNair Postbaccalaureate Scholar <i>Academic Achievement Program, UCLA</i></p> <ul style="list-style-type: none"> • McNair Thesis: Sense of Belonging and the role of Stereotype Threat on Resource Utilization to Incoming UCLA Transfer Students • Principal Investigator: Cecilia Rios-Aguilar, PhD (Education) • Abstract excerpt: <p>Fifty-nine students were recruited and self-selected to either an intervention or comparison (control) condition. Participants in the intervention condition received letters from graduated transfer students and completed reflection exercises; both were used to generate feelings of interdependence at the transfer university. Analysis plan included measuring within-group differences bi-weekly from the start to the end of the term and between-group differences were analyzed at the conclusion of the term. Results indicated that participants in the intervention condition reported: higher collective self-esteem, reduction in independence and an increase of interdependence over the course of the term.</p>
Aug 2017 – May 2018	<p>Community College 2 PhD Scholar (CC2PhD) <i>UCLA and Cerritos College</i></p> <ul style="list-style-type: none"> • Project: Adverse Childhood Experiences and their Impact on Academic Achievement • Supervisor: Jaclyn Ronquillo-Adachi, PhD (Psychology) • Abstract excerpt: <p>Forty-one undergraduate community college students were recruited through haphazard sampling and completed an online survey. Prior scales for adverse childhood experiences, resiliency and academic self-efficacy were used. Participants were aggregated into either high or low ACE categories. Results found that lower level of self-reported trauma were linked with decreased perseverance, decreased adaptive help-seeking behavior, and decreased academic self-efficacy.</p>

Skills and Software Expertise

- R Programming (fluent)
 - dplyr/tidyverse
 - ggplot (graphs)
 - stargazer (regression)
- Python (fluent)
 - pandas/NumPy
 - SciPy/Sci-kit learn
 - matplotlib
- Web Design (conversational)
 - HTML/Web scraping
 - Javascript/CSS
 - APIs
- Survey Design (fluent)
 - Qualtrics/Survey Monkey
 - MTurk/Prolific
 - formr
- Miscellaneous
 - C++
 - ~~W~~^T_EX/Overleaf
 - Stata

Forthcoming Publications
